

Supreme Ley Range

ULTIMATE FORAGE QUALITY

Top quality grass seed mixtures, giving outstanding field performance

The Supreme range of grass ley mixtures are specifically designed to incorporate some of the best available varieties, tried and tested in UK conditions

Please always contact:

Supreme Shorter Term

A superb 2 to 3 year intensive silage and grazing Ley. Gives good early and late season bite, plus very high silage yields with high sugar content. Can be cut up to 4 times per year or used for zero grazing.

Weight (Kgs)	Variety	Species
4.00	DANEGRO/GEMINI	(Tet Ital Rg)
4.00	LIGRANDE	(Dip Ital Rg)
3.00	SOLID	(Hybrid Rg)
3.00	ASTON BONUS/GLENSTAL	(Int Tet Prg)

14.00 Kgs / Acre Pack

Supreme Medium Term

Designed for 3 to 5 years duration. Ideal for dual purpose use on mixed livestock farms. Suits intensive regimes for dairy or silage systems. Medium term contains no Clover, enabling easy cost effective broad leaf weed control after establishment.

Weight (Kgs)	Variety	Species
3.00	SOLID	(Hybrid Rg)
2.00	CITELIAC	(Hybrid Perennial Rg)
4.00	GLENSTAL/ASTON BONUS	(Int Tet Prg)
4.00	BOYNE	(Int Dip Prg)
1.00	ABERMAGIC/NIFTY	(Int Dip Prg)

14.00 Kgs / Acre Pack

Supreme Supercut

A longer duration specialist cutting mixture capable of 5 to 6 years top quality forage production. Contains leading varieties with high cutting scores, plus Timothy to help fill the mid-summer gap. Soluble carbohydrate / sugar levels are outstanding. Top quality combined with good ground cover and persistence.

Weight (Kgs)	Variety	Species
3.50	GLENSTAL	(Int Tet Prg)
3.00	BOYNE/PREMIUM	(Int Dip Prg)
4.00	TWYMAX/ALFONSO	(Late Tet Prg)
3.00	CANCAN	(Late Dip Prg)
0.50	TIMOTHY	
14.00 Kgs / Acre Pack		

Supreme Long Term Dual Purpose

A highly flexible and productive long term Ley, inclusive of a quality White Clover Blend, containing medium and large leaved varieties. Absolutely perfect for a range of livestock situations. Gives exceptional high sugar silage, plus highly digestible aftermaths. (Duration a minimum of 5 to 7 years). Options without Clover/Timothy.

Weight (Kgs)	Variety	Species
3.00	NIFTY/BOYNE	(Int Dip Prg)
3.00	GLENSTAL	(Int Tet Prg)
1.00	ASTON BONUS	(Int Tet Prg)
3.00	TWYMAX/BIJOU	(Late Tet Prg)
3.00	CANCAN/PASTOUR	(Late Dip Prg)
0.25	TIMOTHY	
0.75	DUAL WHITE CLOVER BLEND	
14.00 Kgs / Acre Pack		

Supreme Permanent

An exceptionally hardy and persistent Ley mix, suited to a minimum of 8 to 10 years+ duration. Packed with top Diploid Perennial Ryegrasses to provide a dense durable bottom to the sward. Diploids make this mixture ideally conducive to grazing over a very long period. Flexible to make Hay, Haylage or Silage. First choice for combined Sheep and Cattle enterprises.

Weight (Kgs)	Variety	Species
2.50	GENESIS	(Early Dip Prg)
2.50	BOYNE	(Int Dip Prg)
2.50	FOXTROT/TODDINGTON	(Int Dip Prg)
2.00	CANCAN	(Late Dip Prg)
3.50	ALFONSO/BIJOU	(Late Tet Prg)
0.50	TIMOTHY	
0.50	PERMANENT WHITE CLOVER BLEND (Containing small medium and large leaved varieties)	

14.00 Kgs / Acre Pack

Supreme Total Graze

An outstanding top quality long term grazing mixture, suitable for both dairy cows and other ruminant livestock. It contains only Late Perennial Ryegrasses. The robust nature of this Ley design means not only will it last for a very long time, but is suited to a range of locations and soil types. This highly digestible leafy sward of high sugar grasses will enhance meat and milk production due to the palatability and nutritional gain from the leading varieties in the mixture.

Weight (Kgs)	Variety	Species
3.50	TWYMAX/BIJOU	(Late Tet Prg)
3.50	ALFONSO	(Late Tet Prg)
2.50	FOXTROT	(Late Dip Prg)
1.50	PASTOUR/ABERAVON	(Late Dip Prg)
3.00	CANCAN	(Late Dip Prg)

14.00 Kgs / Acre Pack

**Supreme Total Graze can be ordered with or without
a specialist grazing blend of White Clovers**

PLEASE ASK FOR DETAILS AND ADVICE

Supreme Horse & Pony Paddock Mix

A specialist and proven equine mixture primarily for grazing with an option to cut for hay or haylage. Very long term and highly durable. Horse and Pony Paddock Mix does not contain any Clover to avoid potential Laminitis problems in the Equine species. ALSO PLEASE NOTE: We do not include any Tetraploid Ryegrass varieties in this specific mixture, because they inhibit the easy cutting of hay / haylage and can be detrimental to equine species digestive systems.

Weight (Kgs)	Variety	Species
1.00	BOYNE/PREMIUM	(Int Dip Prg)
1.50	PASTOUR	(Late Dip Prg)
4.75	GENESIS/TEMPRANO	(Early Dip Prg)
3.00	GLENVEAGH	(Late Dip Prg)
2.25	STRONG CREEPING RED FESCUE	
1.00	TIMOTHY	

13.50 Kgs / Acre Pack

Legumes & non legumes for cover crops, fertility building and green manure

As well as Red and White Clovers we also hold significant stocks of other increasingly popular legumes. For example we can supply top quality Vetch / Persian Clover / Crimson Clover / Alsike / Sweet Yellow Blossom Clover / Sainfoin / Yellow Trefoil and Birdsfoot Trefoil to name but a few. We also have **Lucerne** and the non-leguminous green manure options of **Phacelia** and **Mustard** plus Biofumigant options in **Oil Radish** and **Mustard**.

Supreme Catch Crops (The Brassicae based options)

We offer an extensive range of catch crop mixtures. Our Supreme range provides vital nutrition for livestock during those long winter months. We can also create 'tailor made' Brassicae based catch crops to suit a host of situations.

Benefits & Features

Ley Mixture Specifications

All mixture ingredients are fully detailed on each and every bag. If any constituents are unavailable, we reserve the right to use other suitable and equable varieties at the time of processing. Any such alterations will always be specified on all DEFRA seed labels.

Delivery

Delivery can be implemented within 48 hours of receiving your order using our UK wide distribution networks on F.O.C. pallets or by parcel carrier. Next day / 24 hour delivery can be actioned upon request, at a marginal extra cost. AM and timed deliveries are also available, please ask for details.

Wildflowers / Meadow Mixtures / Stewardship

We also have a very comprehensive range of wildflowers to choose from. These can be ordered individually, as mixtures or to compliment amenity and traditional meadow specifications. Under the various stewardship schemes, the choice is extremely wide giving the opportunity for a range of colours and effects to suit a host of different situations.

Game Cover and Cover Crop Seed

We can offer an extensive range of Game Cover Seeds and Wild Bird cover, either as mixtures or as straight species. We also stock a whole host of suitable seed mixtures for both stewardship and cover crop use.

Amenity, Lawn & Turfing Mixtures

We stock many top STRI amenity grass species. We can produce to your specifications a range of high quality amenity mixtures, for recreational, sporting or landscaping purposes.

Technical Support

Technical support / advice on all grass, game cover and wild flower mixtures is always available. We can provide excellent tips on seed bed preparation, seed rates and general husbandry for all types of seed mixtures.
